V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. STATEMENT**

Novelty (N)	Claims	<u>NONE</u>	YES

	Claims	<u>1-12</u>	NO
Industrial Applicability (IA)	Claims	<u>1-12</u>	YES

2. CITATIONS AND EXPLANATIONS

Claims 1-7 lack novelty under PCT Article 33(2) as being anticipated by Rohatgi (EP 0752 786). Rohatgi teaches sending a message, the digitally signed hash of the message and a certificate from the headend to the set top which then recreates the hash and compares to determine both source authenticity and data integrity.

Claims 8-12 lack an inventive step under PCT Article 33(3) as being obvious over Rohatgi ('786) in view of Coutrot et al. Rohatgi does not specifically teach the use of the control word. Coutrot teaches (p. 464, top of right column) the ubiquity of control words in conditional access satellite systems, that they should be transmitted in encrypted form (p. 464 bottom of right column) and their use as input to the Hash. In light of this teaching it would have been obvious to implement Rohatgi with the additional requirement of using the control word.

Claim 1-12 lack an inventive step under PCT Article 33(3) as being obvious over Moore ('527). Moore teaches (at the locations cited) an analogous system for a software reuse library. The only difference is that the context of Moore is not satellite or cable tv. It is well established that teachings regarding "software" encompass all forms of digital data. In this digital age, when television transmissions are digital, the application of Moore's scheme to a TV system using "headends" and "set-tops" is obvious.
